

Week 1 Meeting Minutes

MIT ACT — Crennotech Group Project (Smart Document Scan AI) · Meetings: Mon 20 Jul & Thu 23 Jul 2026

Meeting 1 — Monday 20 July 2026, 6:00 PM (Microsoft Teams)

Attendees: Amrit Dahal, Madhab Poudel, Subham Giri

What we talked about:

- Agreed how we'll work together: use Microsoft Teams, meet Mon & Thu at 6:00 PM, reply within 24 hours, decide as a group.
- Confirmed roles: Amrit = Project Manager, Madhab = Business Analyst, Subham = Technical Lead.
- Talked about the client's problem: SOW documents come in different formats (PDF, Word, Excel, scanned), which makes setup slow. We are NOT deciding on a solution yet — just understanding the problem.
- Set up Jira (one board section per week) and created the GitHub folders: charter, meeting-minutes, requirements, diagrams, risk, final-report.
- Action: Amrit will invite the supervisor and Kiran (mentor) to Jira and GitHub this week.

Meeting 2 — Thursday 23 July 2026, 6:00 PM (Microsoft Teams)

Attendees: Amrit Dahal, Madhab Poudel, Subham Giri

What we talked about:

- Reviewed the project charter (what the project is, its goals, and what's in/out of scope) and agreed on the final wording.
- Madhab shared the stakeholder list and explained who needs the most attention and who doesn't.
- Subham gave a quick update on OCR/AI tools he's been researching — more on this in Week 2.
- Checked that all Week 1 Jira tasks are on track to be finished by Sunday.
- Action: push the charter and stakeholder documents to GitHub by Friday; submit everything to Teams Classroom by Sunday.

Next meeting: Monday 27 July 2026, 6:00 PM — start of Week 2 (Business & Problem Analysis).
